

PsA: collection dei dati a 52 settimane

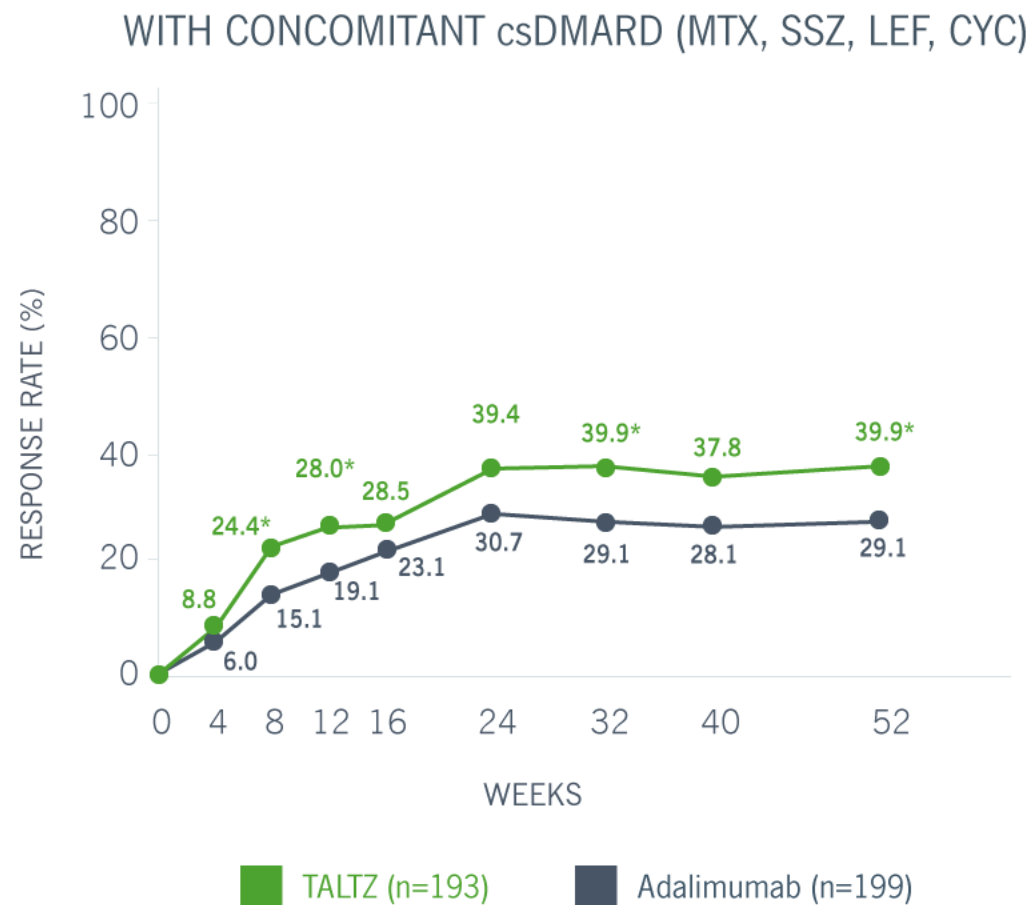

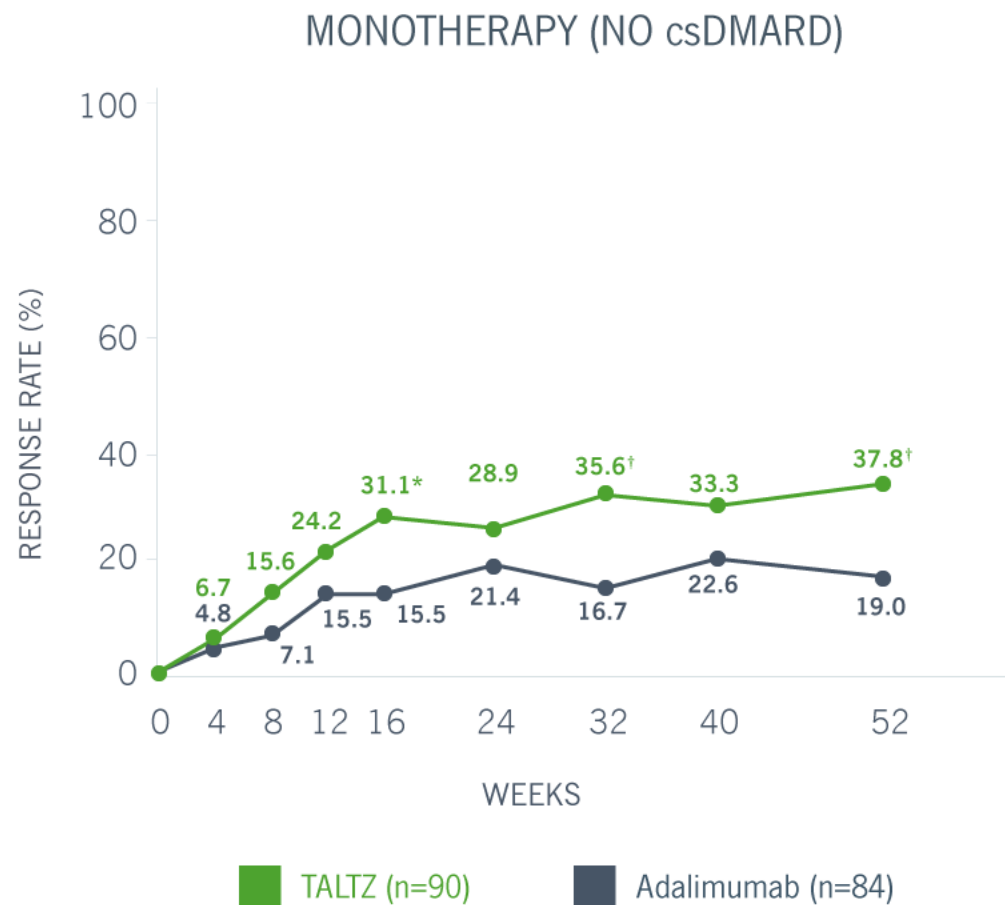

PROF. LUCA IDOLAZZI
PROF. MAURIZIO ROSSINI

GRAPPA update 2020: There are now 8 key domains of PsA

Simultaneous ACR50 and PASI 100 Response by Treatment Week, NRI

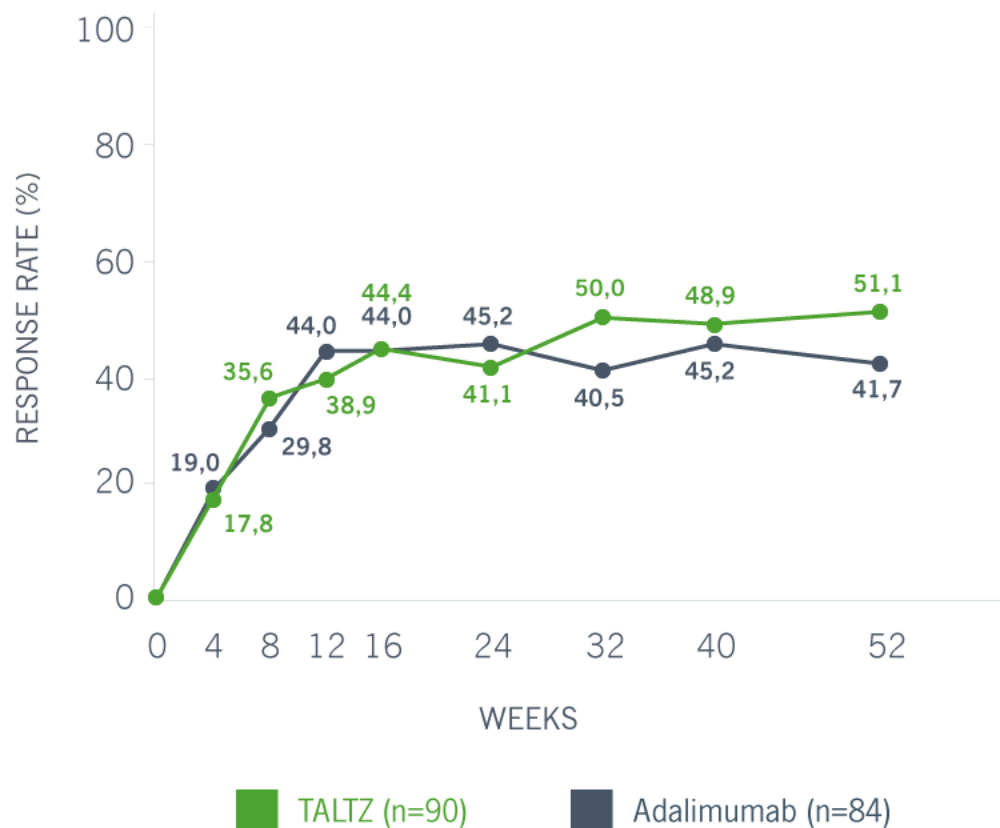

ITT population, no csDMARD or concomitant csDMARD treatment (SPIRIT-H2H)

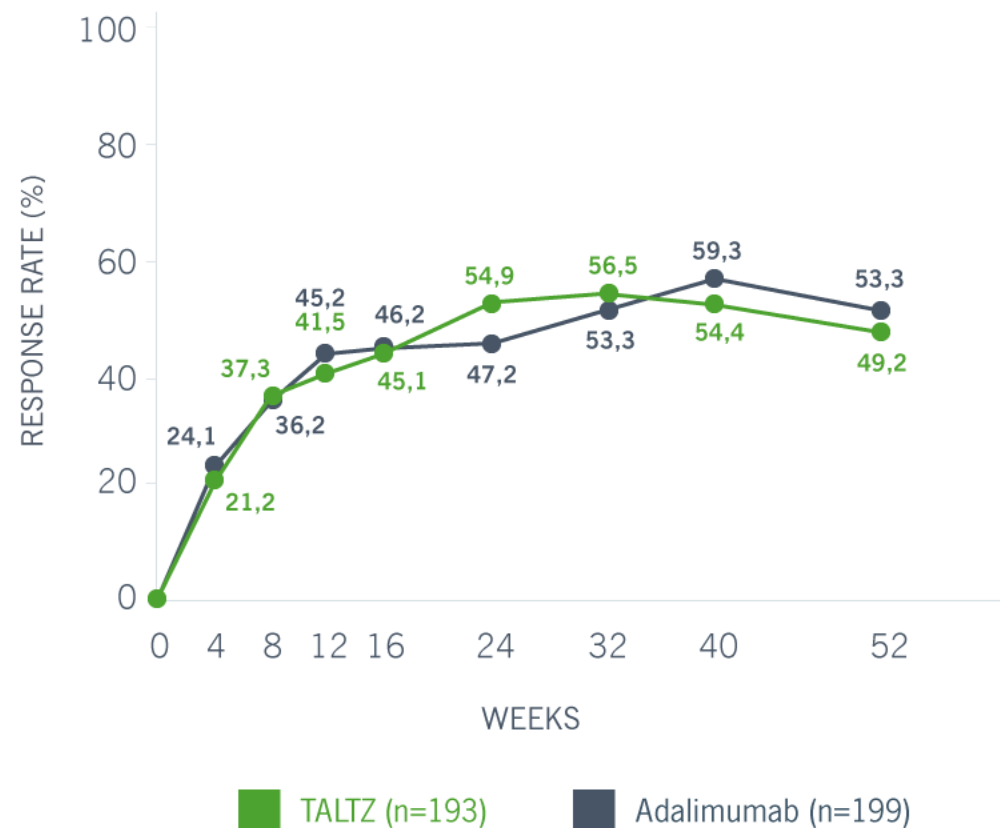

ACR50 Response Rate by Treatment Week, NRI

ITT population, no csDMARD or concomitant csDMARD treatment (SPIRIT-H2H)

MONOTHERAPY (NO csDMARD)

WITH CONCOMITANT csDMARD (MTX, SSZ, LEF, CYC)

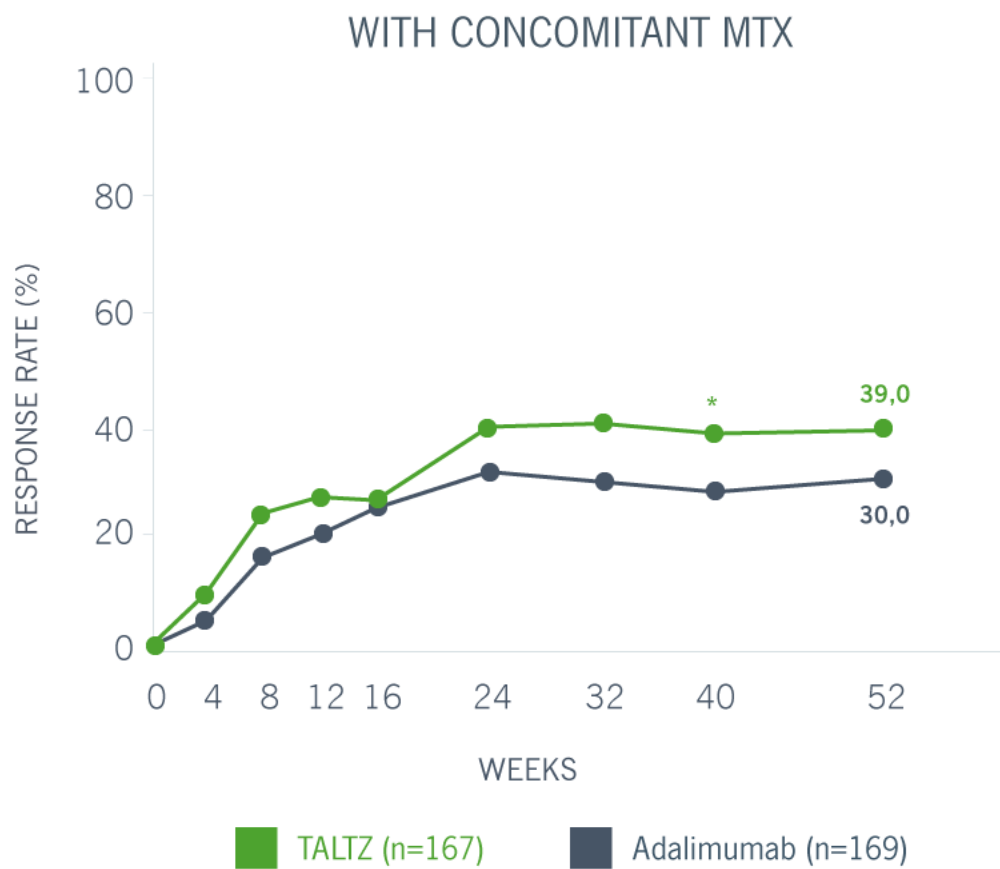

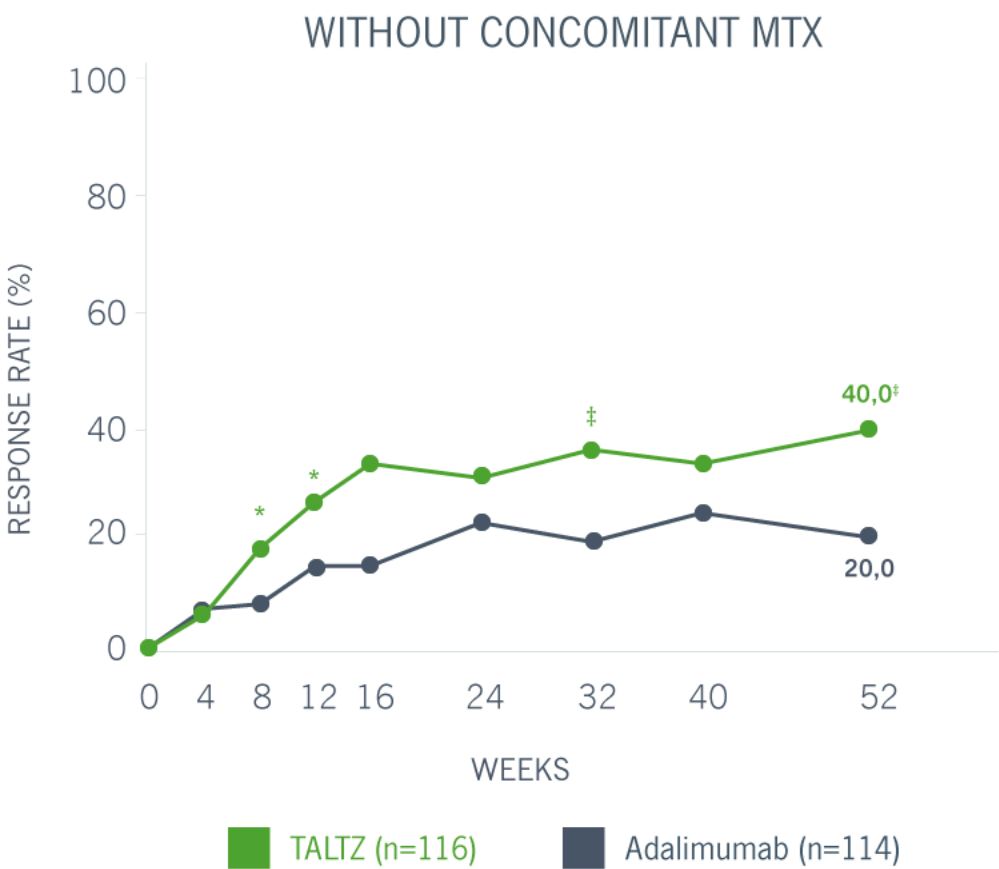

*p<.05 vs. ADA; †p<.01 vs. ADA. Subgroup-by-treatment interaction p=.269.

Smolen JS, et al. Ann Rheum Dis. 2020; doi:10.1136/annrheumdis-2020-217372 (Ahead of print).

Simultaneous achievement of ACR50 and PASI 100 response by treatment week, NRI

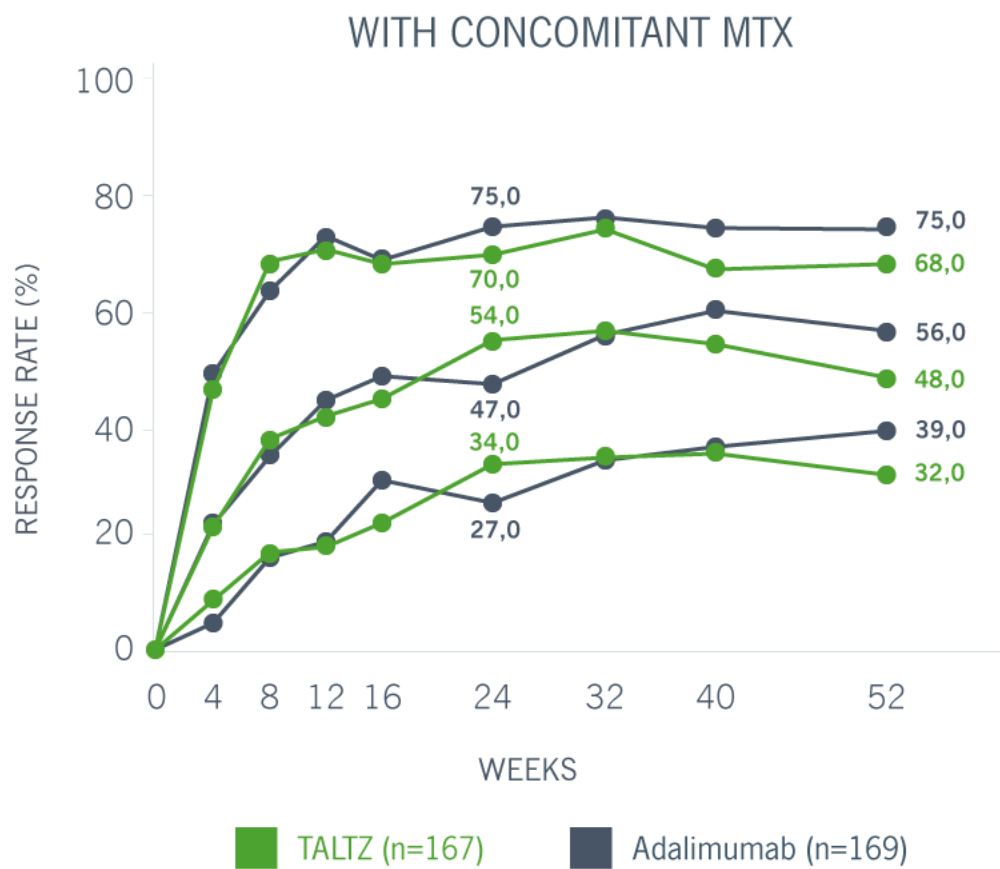

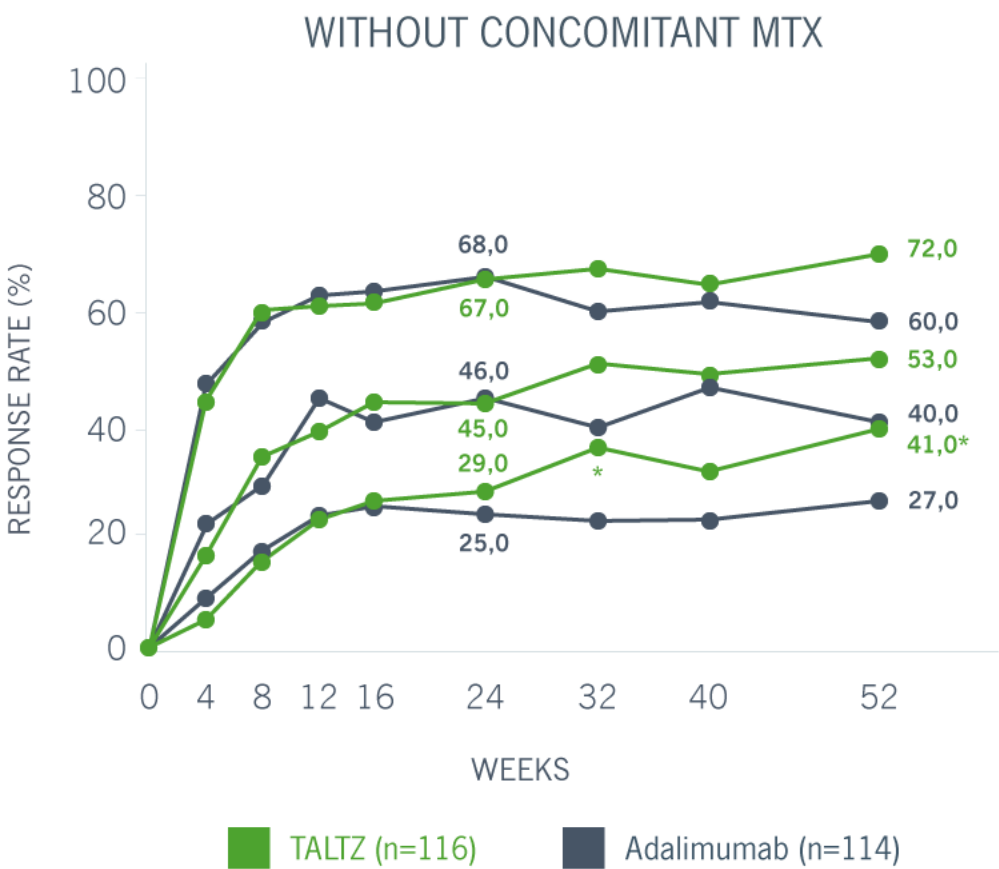

ITT population, without concomitant MTX and with concomitant MTX (SPIRIT-H2H)

*p<.05 vs. ADA; ‡p<.001 vs. ADA; †p<.01 vs. ADA. p for IXE vs. ADA at Week 52 in concomitant MTX subgroup = .108. Subgroup-by-treatment interaction p-value at week 16 = .019; all other time-points, NS.
Note: NRI was used for imputation of all missing data, including drop-outs as non-responders.
Smolen JS, et al. Rheumatol Ther. 2020;7(4):1021-1035.
